

## EXCITING NEWS!

# Journal of Chemical Engineering of Japan

**From 2023, JCEJ will be published by Taylor & Francis!**

Taylor & Francis  
an informa business

Previously published on J-STAGE, the online journal will now be published by Taylor & Francis – one of the world's leading academic publishers.

**JCEJ will be a fully open access journal!**

As an open access journal, all readers will get full and unrestricted access to articles in JCEJ at no charge.

Starting 2023, authors will only have to pay an affordable Article Processing Charge (APC) of US\$1500 regardless of the number of pages published.

In addition, members of SCEJ (the Society of Chemical Engineers, Japan) will receive a 30% discount (US\$1050) on APC.

**World's first!**

**JCEJ will be the first fully open access journal to be published amongst all chemical engineering societies globally.**

**Accepted papers will be published instantly!**

When you publish with JCEJ, your research will enjoy rapid publication, increased visibility, and discoverability.

**New Features!**

The new journal homepage will be housed on Taylor & Francis Online website. The platform is accessible on multiple devices and includes a "Listen" function that can read articles aloud. To find out more, please visit our journal homepage.

**Submit your next paper to new JCEJ today!**
