
JOURNAL OF CHEMICAL ENGINEERING OF JAPAN 掲載論文, Vol.54, No.4 (2021)

[Physical Properties and Physical Chemistry]

- Measurement and Correlation of Diffusion Coefficients of Solutes in Poly(Methyl Methacrylate) under Supercritical Carbon Dioxide117
Yoshio Iwai, Kai Nishiyama, Yasuo Hirayama and Kouya Ueda

[Transport Phenomena and Fluid Engineering]

- A Non-Isothermal Kinetic Model for Modeling NH_3 Selective Catalytic Reduction Process over the Cu-ZSM-5 Monolithic Catalyst126
Chuanxin Bai, Kai Liu, Minghao Yu and Jinjin Liu

[Particle Engineering]

- Detachment of Submicron Particles from Substrates Using the Suspension-Assisted Ultrasonic Method135
M. P. Khairunnisa, Ferry Faizal, Eiji Miyazawa, Kohji Masuda, Mayumi Tsukada and I. Wuled Lenggoro

[Process Systems Engineering and Safety]

- Using Stacked Auto-Encoder and Bi-Directional LSTM For Batch Process Quality Prediction144
Jiakang Qi and Na Luo

- A Prototype Method for Selecting Interventions for Enhancing Medication Adherence in Medicine Taking Processes152
Hirokazu Sugiyama, Norikazu Harada, Eri Amasawa, Masahiko Hirao and Naohisa Yahagi

- Layout Optimization of Process Module on Floating Storage and Re-gasification Unit Using QRA162
Younghun Kim, Sung Hee Kim, Hyun Joon Nam, Woo Hyun Bae, In-Beum Lee and Suh-Young Lee

[Energy]

- Parameter Identification and State Estimation in Management System of Zinc-Nickel Single-Flow Batteries172
Shouguang Yao, Xiaofei Sun, Rui Zhou, Min Xiao and Jie Cheng
-
