JOURNAL OF CHEMICAL ENGINEERING OF JAPAN 掲載論文, Vol.54, No.8(2021)

[Physical Properties and Physical Chemistry]

- Molecular Dynamics Simulation of the Diffusion Coefficients of Anthraquinone in Poly (Methyl Methacrylate) Swollen by Supercritical Carbon Dioxide417
Yoshio Iwai and Kai Nishiyama

[Transport Phenomena and Fluid Engineering]

- A Numerical Study on the Exact Onset of Flow Instabilities in Thermo-Solutal Marangoni Convection Driven by Opposing Forces in a Half-Zone Liquid Bridge under Zero Gravity424
Radeesha Laknath, Agampodi Mendis, Atsushi Sekimoto, Yasunori Okano, Hisashi Minakuchi and Sadik Dost

[Separation Engineering]

- Comparing a Low-Fouling, High-Pressure RO Membrane with a Conventional Seawater RO Membrane for a Zero-Liquid-Discharge System(SC)431
Yasuhiro Tomi, Vasudevan Manikandan, Tomotsugu Miyabe, Ravindra Yeleswarapu, Masashi Echizen and Shunsuke Nomi

[Chemical Reaction Engineering]

- Enhanced Durability of Monolithic V_2O_5 - WO_3 /TiO₂ Catalysts Prepared by a Novel One-Pot Method for the Selective Catalytic Reduction of NO_x with NH₃438
Xi Feng, Kuan Wei, Yanhua Zhang, Zhimin Liu and Yaoqiang Chen

[Process Systems Engineering and Safety]

- Convolutional Neural Networks for Multi-Stage Semiconductor Processes449
Xiaofei Wu, Junhui Chen, Lei Xie, Yishan Lee and Chun-I Chen

[Biochemical, Food and Medical Engineering]

- Direct Electrochemical Hydrogenation of Toluene Using a Microbial Electrolysis Cell Containing a Bicontinuous Microemulsion456
Mami Tanaka, Yu Oku, Rumi Konuma, Yasuhiko Takuma, Kenji Kinoshita and Masahiro Kobayashi

[Materials Engineering and Interfacial Phenomena]

- Analysis of Restitution Coefficient and Hardness of CO₂-Assisted Polymer Compression Products463
Takafumi Aizawa

[Environment]

- Recovery of Phosphoric Acid and Calcium Phosphate from Dephosphorization Slag467
Shigeru Sugiyama, Kenta Imanishi, Naohiro Shimoda, Jhy-Chern Liu, Hidetoshi Satou and Takaiku Yamamoto
-
