
 JOURNAL OF CHEMICAL ENGINEERING OF JAPAN 掲載論文, Vol.55, No.1 (2022)

[Separation Engineering]

- Chestnut-Shell-Derived Magnetic Porous Carbon for Removing Malachite Green Dye from Water ····· 1
Wei Chang, Li Zhang, Jie Qin, Pengfei Zhang, Chengyu Fu and Tatsuya Fujino
- Operation Design of Co-Crystallization Using Homogeneity Evaluation Including “Single Component Excess” Index ··· 8
Mitsuki Ohyama, Shuntaro Amari and Hiroshi Takiyama
- Modeling Hydrogen Sulfide Removal Using Sodium Carbonate in Rotating Packed Beds: A Contribution Ratio Analysis ····· 15
Liu Li

[Chemical Reaction Engineering]

- Effect of Methane Injection Methods on the Preparation of Silicon Nanoparticles with Carbon Coating in Induction Thermal Plasma ····· 22
Xiaoyu Zhang, Kentaro Yamano, Ririko Hayashida, Manabu Tanaka and Takayuki Watanabe

[Process Systems Engineering and Safety]

- Canonical Variate Nonlinear Principal Component Analysis for Monitoring Nonlinear Dynamic Processes ····· 29
Liangliang Shang, Aibing Qiu, Peng Xu and Feng Yu
- Online Batch Process Monitoring with a Combination of Normal Operating History Data and Physical Knowledge ··· 38
Junqing Xia and Yoshiyuki Yamashita
- Feasibility Analysis of Integrated Power-to-Ammonia Processes Employing Alkaline Electrolysis and Air Separation · 51
Seok Young Lee, Jun-Hyung Ryu and In-Beum Lee

[Materials Engineering and Interfacial Phenomena]

- Biodegradable Crosslinked Chitosan Gel Microbeads with Controlled Size, Prepared by Membrane Emulsification-External Gelation and Their Application as Reusable Adsorption Materials ····· 61
Anchali Kalidason, Kaori Saito, Yuki Nanbu, Hideki Sasaki, Rina Ohsumi, Akihiko Kanazawa and Takashi Kuroiwa

[Energy]

- Ex situ* Visualization and Network Analysis of Water Distribution in Gas Diffusion Layer of Polymer Electrolyte Fuel Cells by Synchrotron X-Ray Computed Tomography under Water Injection ····· 71
Satoru Kato, Satoshi Yamaguchi, Akihiko Kato, Yoriko Matsuoka, Yasutaka Nagai and Takahisa Suzuki
-
